■ ... Versatility pays ...

... Bizerba Basic class BC II Scales

Top design and quality "Made by Bizerba" – a German high-tech company. Hardwearing, easy to clean and straightforward handling: to perfectly meet Asian market requirements. With a notably widened spectrum of performance characteristics, the new Basic class has created its own set of benchmarks for electronic retail scales with pricing and printing functionality in stand-alone operation.

...better for every basic requirement...

Tomorrow already today
Thanks to programmable flash memory, the fiddly business of exchanging EPROMs is a thing of the past. Saves on material and servicing costs.

Greater advantages, greater future

Bizerba BC II scales can be used in a variety of ways. Based on a consistently multi-functional concept, they are especially suitable for use as full- or quick-service scales and for printing price labels. On request they can be equipped with rechargeable batteries which have an operating time of 20 – 25 hours. The compact machines are also ideal for mobile businesses and market stalls. They can be connected to an external 12 volt battery and have a standard connection to a cash till providing additional paying in and paying out functionality.

The Bizerba Basic class is designed with a PC connection with its own management software acting as a data base and backup for all data generated by the scales. Article data such as basic/piece price, article identifier, article group, expiry date, bar code, tare, max. 6 digit PLUs can be entered via the integrated keyboard and stored inside the scales and easily modified, if required. Or, even more conveniently, you can manage the data via your PC. With 2 MB RAM you can store up to 10,000 PLUS. Just as useful is the 4 MB flash memory which allows the scales program software to be updated directly from the PC. Together with the high speed processor, the new Bizerba Basic class offers technological highlights which have up till now been the exclusive domain of top-end machines.

Fast, centralized data programming and servicing, and connection to Inventory Management Systems makes the BC II scales high-fliers in their class.

Now that's impressive

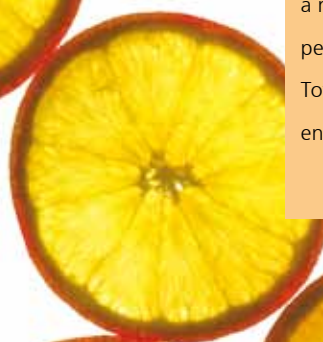

Bizerba BC II scales are one of the few available on the market with an integrated robust high-performance label printer – including an optional thermal printer – convertible to a receipt printer – which reliably prints high quality adhesive price labels and till receipts. A “direct” key allows the operating mode of the scales to be easily

changed.

Equally impressive is the increased speed of printing (up to 102 mm/s). The durability of the print heads has

been proven to be extremely high which keeps maintenance costs to a minimum. Good news for top performance at low price and the Total Cost of Ownership over the entire lifetime of your scales.

Basic class is top class: flexible PLU memory, backlight display technology and ergonomic keyboard layout.

... Avoid errors, win time ...

... be successful

The high quality membrane keyboard with 84 keys can be fully customized to your needs. Colored keys, pictograms and easily recognizable article identifiers mean the keyboards are easy to understand and operate. You'd like to know more? We'd be only too pleased to help you! You can recall and print information about PLUs, server or product groups – including total turnover – from the scales directly or remotely from a PC connected to the scales, which is often more convenient. And so you can plan and measure your success with your BC II scales.

Convincing opinion, attractive outlook

Thanks to the orange backlight, the 7 segment LCD display has more contrast than ever before. This relieves sales personnel of stress, and allows the customer to follow the instructions more easily. In addition to the numerical display, the new Bizerba Basic class also has an optional alphanumeric display which can even display Chinese characters. A feature that can provide more information and transparency during conversations with customers. Up till now they could only trust sales staff to be honest; now, in addition to the amount and price, customers can check themselves whether the product is the correct one. And when the scales aren't being used, the display can show running texts for special offers and advertisements at the point of sale. This is not an idle luxury: evidence shows that the chances of increased sales are particularly good. Especially so, when articles texts of up to 25 characters can be shown.

Regardless of the model, working with the Bizerba Basic class is always fun thanks to its ease of use, reliability, and the highest standards of design and materials used. The finest detail has been thought about. For example, how the machine can be hygienically cleaned in the shortest possible time. Design and function at their best.

... Instead of a standard solution, get the one that's best for you

Just as you imagine it should be

Bizerba BC II scales are available in different models:

- Electronic top-pan scales
- Electronic top-pan scales with customer display mounted on a stand
- Electronic shop scales with display, operating unit and printer mounted on a stand
- Suspended scales, for the sales or self-service, particularly suitable for wet areas (such as fruit, vegetables or fish)

Company-wide DIN EN ISO 9001 certification means our quality management guarantees a high level of product safety.

The daily cleaning of the scales is very much simplified thanks to smooth round-edged surfaces and robust keyboards. The printer can be cleaned inside and out by removing the printer heads. And should something not work as it should, the Bizerba Service team is there to help you, quickly and competently.

Bizerba's modular range of service agreements with its preventative and maintenance servicing guarantees high operational availability of your investment. In addition Bizerba offers an extensive selection of original parts.

Next generation retail concepts, from a single source, with the know-how of the specialists in fresh food

BC II 800 E
Electronic retail scales with display, keyboard and printer on a mounted stand

BC II 200 F-E
Electronic top-pan scales with customer display on a mounted stand

BC II 100 E
Electronic top-pan scales with label printer

BC II 400
Suspended scales

Multi-use BC II scales offer all the functions and features you expect these days as well as fast and easy operation. Eye contact with customer always guaranteed.

Weighing range

- 6/15 kg with scale division 2/5 g, starting with a minimum load of 40 g.

Label Printer

- 432 dots; 8 dots/mm resolution; printing speed 102 mm/s; graphic functionality; logo printing; upper and lower case letters; multiple font size and styles; EAN/UPC bar code; max. label length 145 mm; receipt width 58 mm; print width 54 mm; customizable labels; numerous pre-defined and fully customizable label sizes and layouts; transferable to adhesive thermal and normal thermal print; label layout on thermal paper; optional talon.

Display

- 7 segment LCD with backlight; height of digit 12 mm; 4 or 5 digit weight display; 6 digit basic/sales price display; 4 digit tare display
- Optional: 7 segment LCD with backlight, height of digit 12 mm; 4 or 5 digit weight display; 6 digit basic/sales price display; extra LCD dot matrix display with backlight for article text up to 25 digits; 4 digit tare display; advertising information

Keyboard

- Membrane keyboard; fully customizable; 84 keys, 30 of which are function keys and 54 direct keys for PLUs and other function keys; integrated programming keyboard; membrane keyboard on top of insert can be written on.

Self-service keypad (BC II 400)

- Short-stroke, tactile with membrane
- Number of self-service keys: 48 standard
- Number of self-service keys max.: 72 or 120
- Extra large self-service keys: max. 12 or 24
- Mixed components with different key sizes possible

Fast operator keypad (BC II 400)

- Short-stroke, tactile with membrane
- Number of QS keys: 96 standard
- Extra large QS keys: max. 12 or 24
- Mixed components with different key sizes possible

Data memory

- 2MB RAM for 10,000 PLUS with basic price and article text

Programmable data per PLU

- Basic/piece price; product identifier max. 500 characters; additional text max. 6000 characters; article group; expiry date; bar code; price overwrite function; tare; by count; price basis kg, 100 g, 500 g (only china version); origin information identifier

Operating modes

- Full- or quick-service function; cash till functions including paying-in/ paying-out mode; manual or automatic price labeling, with or without addition; weight labeling; piece no. pre-selection for automatic printing

Interfaces

- Ethernet interface (100 Base-T) for connection to the data processing department, till drawer

Reports

- Complete, user, PLU, article group and origin information

Further features

- Ticket voiding, continual date/time update, customizable EAN code, multi-lined header and footer (on receipts only), selectable height of EAN code, proof of origin of meat products, 99 article groups, Repeat/re-open receipt, foreign currency conversion, rounding of customer total, subtotal, scales program software downloadable via the interface, 16 keys for sales personnel, 4 tare fixed value keys

Battery operation¹⁾

- Internal Li-ion battery pack, rechargeable via the scales' mains supply, operating time approx. 20–25 hours (controlled charging), display of battery status

External battery operation¹⁾

- 12V, using a special battery connection cable

Temperature range

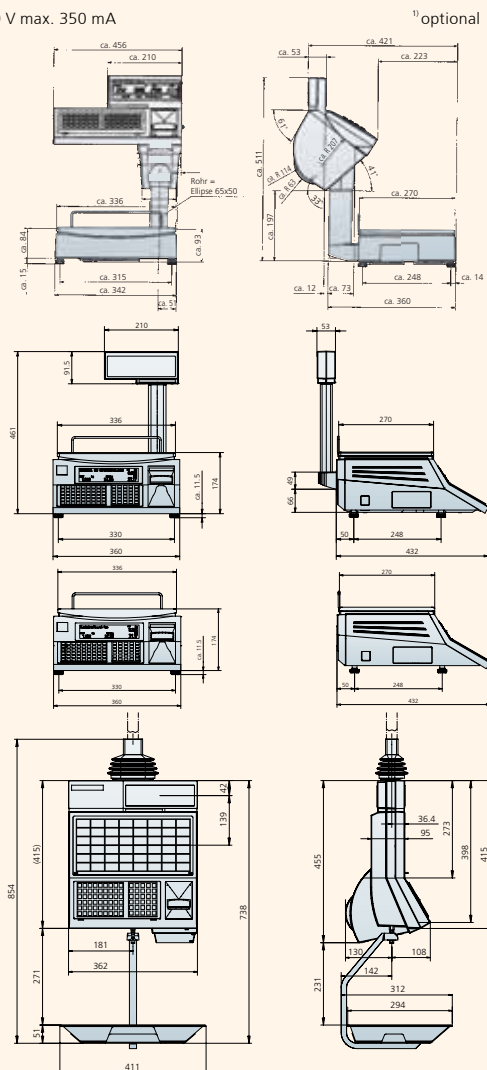

- 10° – +40°C

Operating voltage

- (-10 +6%) 230V or (-15 +10%) 120V

Current consumption

- at 230 V max. 250 mA
- at 120 V max. 350 mA
